Guidelines for Exporters for Completion of Regulation (EC) 1774 Export Certificates

This guidance is intended for Regulation (EC) 1774/2002 certificates formatted to contain the following two sections:
- Part I: Details of dispatched consignment; and
- Part II: Certification.

The guidance contains APHIS' best understanding of the proper formatting. APHIS does not confirm prior to endorsement that the information in Part I is completed as required by the EU. Prior to export, **the exporter should always ensure that they have the required certificate endorsed, and have their importer confirm with the specific importing EU country as well as the EU Border Inspection Port (BIP) that the certificate is completed in an acceptable fashion.**

The EU requires all certificates to be endorsed prior to the shipment of products from the U.S.

Title
The title may be left unchanged. It is not required to line-out either "for dispatch to" or "for transit through."

Part I: Details of Dispatched Consignment

I.1   Enter full name, address, and telephone number of consignor (entity in the US exporting the product).

I.2   The exporter should leave this box blank- the Area Office will insert a certificate number prior to endorsement.

I.2.a   Leave blank.

I.3   Enter "APHIS-VS".

I.4   Enter VS Area Office endorsing certificate, "VS-XX", where XX is the State in which the endorsing office is located. (For example, enter "VS-VA" if the certificate is going to be endorsed by the VS Area Office in Virginia.)

I.5   Enter full name, address, and telephone number of consignee (entity receiving the product in the EU). The postal code is only required if it is part of the address of the consignee (some EU member countries do not yet have postal codes as part of addresses).

I.6   Leave blank if the consignee is in the EU. For shipments transiting the EU, enter full name, address, telephone number, and postal code (if applicable) of person taking responsibility for the consignment in the EU.

I.7   Enter "US" and "US-0".

I.8   Draw a single diagonal line through the box.

I.9   Enter destination country name and ISO code [Austria AT; Belgium BE; Bulgaria BG; Cyprus CY; Czech Republic CZ; Denmark DK; Estonia EE; Finland FI; France FR; Germany DE; Greece GR; Hungary HU; Ireland IE; Italy IT; Latvia LV; Lithuania LT; Luxembourg LU; Malta MT; Netherlands NL; Poland PL; Portugal PT; Romania RO; Slovakia SK, Slovenia SL, Spain ES; Sweden SE; and the United Kingdom/Northern Ireland GB].

I.10   Draw a single diagonal line through the box.

I.11   Enter the following information for the APHIS-approved facility producing the product (must be the same as the approved facility listed in I.28): Establishment name, address, and APHIS Reference Number.

I.12
   • Shipments destined for the EU: Draw a single diagonal line through the box.
   • Shipments transiting the EU, for example to Russia: insert the name, address, and postal code (if applicable) of the warehouse where the consignment will be stored while in the EU. Also, enter the approval number assigned by the EU to this warehouse. The EU individual listed in block I.6 should be able to obtain this number for the exporter. If an approval number is not available, the EU will not permit the consignment entry into the EU for transit. APHIS will not confirm these numbers prior to endorsement.

I.13   Enter port of exit from the U.S. (place of loading onto the ship or plane). In cases where the port of exit is not known, the location (city/state) of the warehouse from which the consignment is shipped to the port of exit may be utilized.

I.14   Enter date of expected shipment departure from the U.S. This should be the date the shipment will depart from the port of exit, but may be the date the consignment departs the warehouse for the port of exit. **This date must be after the date of the certificate.**

I.15   Select the method utilized to transport the shipment from the U.S. to the EU must always be indicated. Only one method may be selected.

For "identification," list the name of the shipping line or airline that is expected to be utilized to transport the consignment from the port of exit to the EU. While the EU is believed to require the identification of the specific ship or flight number in this box, APHIS will not refuse to endorse if the block is left blank.

"Documentary references" may be left blank if the consignee is located in the EU. For transit shipments, the exporter should include the bill of lading or airway bill number.

If the "identification" or "documentary references" information changes after the certificate is endorsed, the exporter must notify EU officials at the border inspection port (BIP) in advance of the change. However, the certificate does not need to be amended, and no documentation from APHIS is required for the change. The exporter may not make the change to the certificate. No alternations may be made to the certificate after endorsement by the Area Office.

Draw a single diagonal line through unused space in this box.

I.16   Enter the EU Border Inspection Post (BIP). This is the port of first arrival to EU. The official BIP code should be utilized. The exporter should work with the importer to confirm that the official code is utilized. For example, for Dublin Airport, enter: "IE 02999". A resource is located on the Internet: http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32007D0616:EN:NOT

I.17   Typically this box is left blank. If a CITES document is required for the consignment, enter the CITES document number here. Draw a single diagonal line through the box if no CITES document is required. (Some certificates have this line pre-printed.) For more information on when CITES documents are required, and how to obtain them, visit the U.S. Fish and Wildlife Service Website: http://www.fws.gov/le/ImpExp/CommWildlifeImportExport.htm

I.18   Include a general description of the exported materials, e.g. canned pet food. The information should correspond to the HS code entered in block I.19.

I.19   Generally, the code will be pre-printed on the certificate, either in block I.19 or in the footnotes. Enter the code as indicated on the certificate (either pre-printed in block I.19 or on the bottom of the certificate). The exporter should work with the importer to confirm that the appropriate code is utilized. A resource is located on the Internet: http://eur-lex.europa.eu/LexUriServ/site/en/oj/2002/l_121/l_12120020508en00060030.pdf

I.20   Include both the Gross Weight AND the Net Weight of the consignment. While the EU has indicated that both are required, APHIS believes that for small shipments where the gross weight and net weight are essentially the same, the exporter may enter only one number here. [Gross weight is the weight including packaging but the EU has indicated the shipping container weight does not have to be included. Net weight is the weight of the materials shipped not including packaging.] **Only METRIC units (e.g. KG OR GRAMS) may be utilized in this box.**

I.21   Select the appropriate box.

I.22   Enter total number of pieces or packages in the consignment.

I.23   Generally the container number is only required for consignments shipped in bulk. Seal number is only required when the certificate indicates that the materials are in "officially sealed containers." This box will commonly be left empty- in these cases, draw a single diagonal line through the box.

I.24   The EU has specific terminology for different types of packaging, e.g. "bag, paper, multi-wall." The exporter should work with the importer to confirm that EU accepted terminology is utilized. A reference list of EU terms for "types of packaging" is included at the end of this document.

I.25   Depending on the certificate, there may be multiple options. Select one. "Animal feedingstuff" includes all materials intended for consumption by animals, including pets. "Technical use" includes materials intended for uses such as pharmaceutical and diagnostic purposes. "Other" includes items that do not belong in either of the previous options, e.g. game trophies.

I.26
- For shipments destined for the EU, leave blank.
- For shipments transiting the EU: Select the box, and enter the name and ISO code of the country of destination. A resource for ISO codes is available on the Internet: http://www.iso.org/iso/country_codes/iso_3166_code_lists/english_country_names_and_code_elements.htm

I.27
- For shipments destined for the EU: Select the box.
- For shipments transiting the EU: Leave blank.

I.28   Required information varies depending on the certificate. Most certificates have requirements to list the following 4 items:
1. Species (Scientific name): The exporter should include the names of the species of origin of the materials being exported. Examples include: bovine, piscine (fish), caprine (goat), ovine (sheep), porcine (pig), avian (poultry).
2. Approval number of establishments-Manufacturing Plant: This must be the approval number granted by APHIS to the facility approved for export to the EU under Regulation (EC) 1774/2002. This should be the same number as entered in I.11.
3. Net weight.
4. Batch number: This is the lot number(s) of actual materials in consignment.

Part II: Certification

II.a   The exporter should leave this blank- the Area Office will insert the certificate number from I.2 prior to endorsement.

II.b   Leave blank.

The exporter should leave **the rest of Part II** blank with the following exceptions.

1. When preparing the certificate the exporter must include all text from the certificate on the IREGs. The exporter may not electronically or otherwise delete these items. Where there is an "and/or" statement, the exporter must line-out the selections that are not appropriate. Prior to endorsement, the VS Area Office will confirm that the line-outs were verified by inspection of the production facility, and initial each line-out. The exporter should consult with the VS Area Office endorsing the certificate for more information on appropriate methods to utilize for "either/or" statements.
2. Where the certificate has blanks for information such as processing parameters. In these cases, the exporter should type the missing information into the blanks, and the VS Area Office will confirm prior to endorsement.

No additional pages should be included with the exception of, where required, the <u>Specified Risk Materials Certification</u>.

This form must become the last page of most Regulation (EC) 1774/2002 certificates. Some countries may have different requirements. If exporters believe they are exporting a commodity that is exempt from this requirement, they should have their importer confirm with the government authorities in the importing country. The exporter should always confirm they have all required certification prior to export.

If you have further questions, contact the VS Area Office serving the area in which you are located.
